

# RD-1

MINI RED DOT SIGHT

IMI-Z3100

THE RD1 MINI RED DOT SIGHT, is a versatile and lightweight sighting solution for handguns, rifles and shotguns. A parallax free 1X red dot with 4 MOA reticle, coated glass lenses and anodized aluminum construction ensures optimal performance in the most extreme conditions. Removable honeycomb filter reduces glare and prevents lens reflection during bright sunlight applications.

12-position rotary on/off switch

Elevation and windage adjustment

BATTERY DOOR SCREW

## FEATURES & TECHNICAL DATA

---

- 12-position rotary on/off switch.
- Wind age and elevation adjustments.
- Anti-reflex and multilayer band pass optical coating.
- M1913/Weaver rail mount.
- (1) CR2032 Lithium battery.

<b>Material housing</b>	Extruded aluminum (Anodized)
<b>Weight</b>	4.5oz / 126g (4.7oz / 132g with filter installed)
<b>System</b>	Passive red dot collimator
<b>Magnification</b>	1X
<b>Eye Relief</b>	Unlimited
<b>Parallax</b>	free - no centering required
<b>Reticle size</b>	4 MOA (minute of angle)
<b>Optical coating</b>	Anti-reflex & multilayer band pass
<b>Battery type</b>	(1) 3V CR2032 lithium
<b>Battery life, typical</b>	8000 hours position 1
<b>Switch settings</b>	1 off / 11 on varying intensities
<b>Adjustment</b>	13mm@100m / 1/2"@100yds
<b>Adjustment range</b>	+/- 1.4m @ 100 meters windage & elevation
<b>Temp range</b>	-5 degrees F to + 130 degrees F
<b>Water resistance</b>	0.5m for 20 minutes
<b>Length/width</b>	2.7" x 1.7" (68mm x 42mm) Length 3.0" (76mm) with filter installed
